Item # ARPAC 105-70, Shrink Bundler For Oversized Products

Shrink Bundler For Oversized Products

The 105 SERIES shrink bundlers are designed to handle large stacks of products with a "bull's-eye" enclosure. An optional side seal mechanism creates packages with a full enclosure for increased product protection during distribution. Typical applications include: stacks of pizza boxes, windows, doors, ceiling tiles, floor mats, wall panels and much more. The 105 SERIES accommodates a maximum film width of 89".

Stacks of product proceed via an infeed conveyor to the seal area where the stack moves through the film web and the seal frame. Once enveloped with shrink film, the stack automatically stops and the seal closes, forming a film sleeve around the stack. Optional side seals (no trim) are then applied. The stack advances through an integrated shrink tunnel chamber. The bundle exits the shrink tunnel, passing under a turbo cooling system which accelerates the curing of the stack.

APPLICATIONS

Boxes

Ceiling tiles

Fluorescent Lighting Fixtures

Paper products

Pizza boxes

Shower Doors

Stock Boxes

Windows
