## Item # XLR8-CF-SS, Servo-Driven Side Seal Horizontal Shrink Wrapper

The XLR8-CF-SS side seal horizontal shrink wrapper is one of the most versatile, servo-driven packaging machines on the market today. It is capable of wrapping up to 175 packages per minute in clear or print registered film. This continuous motion XLR8 film folding system eliminates the need for multiple forming heads with its adjustable film former.

Unlike conventional film inverters, the XLR8-CF-SS film path ensures equal transfer of grouped products onto the film without skewing the product configuration making it ideal for multipacks and irregular shaped products.

Multi-axis, servo-driven operation offers precise, electronic control for immediate and accurate sealing action, ensuring strong, consistent seals. The seal opening height is electronically programmed to vary with product height, maximizing output speeds for smaller products. The servo pouch length adjustment enables "on-the-fly" bag length changes without changing the flight spacing. All adjustments are made from the operator side of the machine and product changeovers can be completed quickly and easily.
