Item # ARPAC EL-2000, Intermittent Motion End-Load Tray Packer/Case Packer

ARPAC's EL-2000 SERIES intermittent motion end-load tray/case packers are designed to serve a wide range of industries. At speeds up to 25 trays/cases per minute, these rugged systems help minimize labor requirements and increase production output.

The EL-2000 combines product accumulation, tray/case forming, loading and sealing into a single compact system, and is well suited to handle a wide range of product configurations and applications including: plastic bottles, cans, boxes, folding cartons, bags and glass jars.

Material savings are realized by the end-load style tray/case. These tray/cases use less materials than conventional top-load style containers.

ARPAC's EL-2000 SERIES is easily integrated into new and existing production lines and with other ARPAC packaging equipment.

- Up to 25 packages/minute
- Labor reduction
- Simple adjustments
- Reduces material costs
- Compact design

EL-2000 Models can be integrated with:

108TW, 25TW, BPTW-5000 SERIES shrink wrappers

Other sizes available upon request

Note: Specifications and product sizes may vary, depending upon the application.
