Item # ARPAC PC-2500, Continuous Motion Wraparound Case Packer

The Performance-Series™ PC-2500 is a member of ARPAC's line of high performance case/tray packers. The PC-2500 is a continuous motion wraparound case/tray packer capable of reaching speeds of up to 25 cases/trays per minute.

The PC-2500 uses up to 20% less corrugated material as compared to regular slotted cases (RSC's) resulting in significant annual material savings.

This rugged machine reduces labor, increases productivity, reduces packaging costs and integrates easily into new or existing packaging lines.

The Performance-Series™ works well with metal cans, paper cans, glass jars, glass bottles, plastic jars and plastic bottles. The system collates the products, loads the corrugated cases or trays and closes them with hot-melt glue.

FEATURES

- Speeds of up to 25 cases/trays per minute
- Uses up to 20% less corrugated material as compared to regular slotted case (RSC)
- Works well with metal cans, paper cans, glass jars, glass bottles, plastic jars and plastic bottles
- Provides tight packages minimizing the need for partitions while protecting glass containers from damage
- Options allow for automatic insertion of partitions/dividers for the ultimate in product protection
- Easily adjusts to varying product sizes, speeds and product patterns
- Runs trays and wraparound cases
