## Item # Spinner LP WNW, Low Profile Manually Operated Motorized Turntable With Wrap-N-Weigh

### Low Profile Manually Operated Motorized Turntable With Wrap-N-Weigh

The ARPAC SPINNER is a robust turntable designed, manufactured and supported to offer trouble free operation. This system is available in high profile and low profile.

#### Mode of Operation

The forklift places the pallet load onto the turntable of the ARPAC SPINNER TURNTABLE. The machine operator attaches the film to the pallet and starts the wrapping cycle by depressing the foot pedal and feeding the film via a hand held film dispenser. When the wrapping is complete, the operator stops the turntable by releasing pressure on the foot pedal, tears the film and attaches the tail to the wrapped pallet. The pallet can now be removed from the turntable.

## FEATURES

- Heavy-duty, welded steel construction (no plastic panels) designed for long life
- Environmentally friendly Powder Coated paint
- Wraps loads up to 4000 lbs on 60 in. round "Low Profile" turntable for pallet lifter / fork truck access
- 12 RPM turntable can deliver up to 40 loads per hour
- Turntable direct drive ½ HP, 90VDC, with ANSI 50 chain
- Eight point caster support for 60" turntable
- UL approved components
- Forklift portable
- "Soft Start" Foot Pedal Controlled
- Hand held film dispenser (not supplied)
- Infinite wrap pattern freedom
- Features electronic load cells into turntable and digital read out of weight.

#### Guarding and Finish

- No exposed chains, sprockets or machine drive mechanisms.
- The Powder Coated paint system is standard on all Arpac Stretch equipment.
