Wrap-N-Weigh®

All ARPACSTRETCH™ platform stretch wrapper models are available in the WRAP-N-WEIGH® configuration. This alternative feature combines wrapping and weighing into one operation by integrating a precision scale and digital controls with either high or low profile turntables. Combining the two functions into one brings greater economy and efficiency to any wrapping operation requiring weighing. All low profile models are designed to be loaded using a pallet truck. Contact your distributor for more details on the WRAP-N-WEIGH® that's best for you.
