

# PROCESS VESSELS-PHARMACEUTICAL

A&B PROCESS SYSTEMS YOUR COMPLETE PROCESS SYSTEM PARTNER

Integrity of materials and components is a priority for many pharmaceutical and biotech manufacturers. With our special segregated "Hygienic" facilities, we can fabricate process vessels to pharmaceutical grade requirements using stainless steel or special alloys.

# PROCESS VESSELS-PHARMACEUTICAL

A&B PROCESS SYSTEMS YOUR COMPLETE PROCESS SYSTEM PARTNER

A&B Process Systems designs and fabricates stainless steel process vessels to 3-A, USDA, cGMP, ASME (U&R), BPE, FDA, and API standards.

Seismic and Finite Element Analysis (FEA) available.

Fabrication is completed in a 100% stainless steel hygienic and controlled environment to prevent cross-contamination of materials.

Process vessels are designed for optimal clean-in-place capabilities.

Various heat transfer options available.

Custom agitation systems available.
