

HTST PASTEURIZATION

A&B PROCESS SYSTEMS YOUR COMPLETE PROCESS SYSTEM PARTNER

With more than 30 years of service in the food, beverage and dairy industries, A&B Process Systems is an expert in pasteurization technology and the design, fabrication, and installation of pasteurization systems, particularly HTST systems. From concept to completion, A&B Process Systems can design and built a pasteurization systems that meets your expectations.

HTST PASTEURIZATION

A&B PROCESS SYSTEMS YOUR COMPLETE PROCESS SYSTEM PARTNER

ON-FARM ORGANIC MILK HTST

Design criteria based upon present 3-A sanitary standards and accepted practices.

Customized process engineering solutions for dairy, juice, fluid egg products and more.

Design and fabrication of:
Hold Tubes
Balance Tanks
Hot Water Systems

Insulated and/or shrouded assemblies available on request.

Engineering services available for clean-in-place integration and pre-fabricated modular systems.

Process automation and control systems compliant with current 3-A and/or pasteurization milk ordinance standards and acceptable practices.

Designs to accommodate heat transfer via:
Plate and Frame
Triple Tube
Direct Steam Injection
Batch Pasteurization

SECONDARY STARTER HTST

DIRECT STEAM INJECTION HTST
