

Skidded SYSTEMS modular

A&B Process Systems offers custom fabrication of complete process systems into skidded modular process systems, creating compact, efficient and ergonomic work environments while reducing downtime at installation and start-up.

Benefits:

- Modular design reduces field downtime and installation costs.
- Custom design and fabrication of simple portable process modules to large scale process systems.
- All inclusive tanks, pumps, valves and controls are pre-assembled on a tubular steel frame.
- Factory Acceptance Testing (FAT) completed at A&B prior to installation.
- User friendly operation and controls with on-site training.
- Flexible design integrates into existing equipment and allows for easy expansion.

Downtime
is wasted time.

Chemical Injection/Metering Skids

Pump Skids BATCHING & BLENDING

Slurry Systems **Pilot/Demo Skids**

BIO-GAS CLEANING MODULES
