

Kraft Paper

Converting & Industrial

KapStone is a leading producer of kraft converting and industrial papers used in an extensive variety of packaging applications. Available in basis weights ranging from 20 lb to 78 lb on a 3,000 square foot basis, our kraft paper grades have been engineered to deliver superior performance that meet end use specific requirements.

TYPICAL USES

Packaging & Converting Applications

Coating, Laminating,
& Extrusion
Roll Wrap
End Caps
Dunnage
Void Fill
VCI Base
Counter Rolls

Industrial Applications

Interleaving
Shingle Wrap
Industrial Tape & Labels
Masking

MANUFACTURING LOCATION

Longview, WA
Roanoke Rapids, NC

BENEFITS

KapStone's manufacturing capabilities allow for a wide range of sheet characteristics including finishing options.

- *Soft Calendered* – provides a smooth, glossy surface with low porosity and tight profile ideal for technical coatings that require limited absorption and specialty foil lamination
- *Machine Finish* – provides a natural, matte appearance that performs well in a wide variety of converting, extrusion and poly-coating applications

Our furnish options range from 100% virgin fiber to high quality recycled content. This furnish, together with pulping and refining expertise, provides our customers with access to an industry leading suite of converting and industrial kraft papers.

We take pride in reducing variability across the entire manufacturing process. Our intense focus on variability reduction drives excellent profiles in the machine and cross directions - delivering efficiencies to our customers during the converting process.

We are committed to producing sustainable products for our customers that adhere to multiple forestry certification standards. Through this commitment, KapStone offers end products that are biodegradable, compostable, and recyclable.

SFI® Certified Sourcing and Chain of Custody

PEFC™ Chain of Custody

FSC® Chain of Custody

Compliant with the Lacey Act and EUTR (European Union Timber Regulations)

Compliance with USFDA - 21 CFR §176.170 and 21 CFR §176.180
Allergen free

US California Proposition 65 Compliant
CONEG Model Heavy Metal and EC/94/62 Article II Compliant
Elemental Chlorine Free (ECF) Unbleached fiber
Toy Safety Standards ASTM F 963 and EN71-3
BPA Free

Natural, unbleached kraft paper
Per product application
20 - 78 lb per 3000 square feet

*FSC Chain of Custody Certification applies only to Roanoke Rapids Mill.
