

ULTIMATE - Electronic Cup Removers

The Ultimate electronic cup remover is a reliable general purpose cup remover solution, designed to provide fast and efficient milking while reducing labour costs.

Designed to suit most dairies, it has the pulling power to manage any job with precision and reliability. Made from high-grade stainless steel, its durability is guaranteed. It is an ideal system for Herringbones and suitable for Rotaries.

The versatile Ultimate electronic cup remover system is operated from a central Master Controller where settings can be adjusted to suit your needs. The Ezy Pull-down feature reduces operator fatigue and works in tandem with the exhaust valve, allowing the cords to be released with ease. The Ultimate electronic cup remover also improves cow comfort at cluster removal.

FEATURES:

- AutoStart feature available
- 75mm stainless steel ram
- Snap-on end caps
- Adjustable pre and post milking delay
- Adjustable milk flow sensitivity
- Soft Retract - adjustable ram retraction speed
