# POWERHOUSE CONTINUOUS DUTY VACUUM Silo

## CONTINUOUS DUTY SILO VACUUMS

The Powerhouse Series silo vacuum offers high performance in a compact stationary design by featuring more power and filtration than any other silo vacuum while using less horsepower. A larger CFM combined with continuous duty operation, makes it ideal for the removal of larger and heavier materials and multiple operators. Fully grounded and sealed to protect against static build-up, each silo is built with durable and dependable fiberglass housing that's covered by a lifetime guarantee. It also includes a 55 gallon drum for increased collection capacity. Ruwac's industry-leading MicroClean filtration, optional HEPA and drum upgrades help make the The Powerhouse Series silo the most powerful silo vacuum systems available on the market!
