

The Maxim<sup>®</sup>, from R.A Jones & Co., is the next evolution for tissue cartoning. Based on a modular approach to packaging machine design, the Maxim<sup>®</sup> Tissue can be configured to a customer's tissue packaging needs with the lowest possible cost. The Maxim<sup>®</sup> Tissue cartoner can operate with both flat or cube grade configurations, and can easily interface with any upstream converting machinery. Changeovers are quick, tool-less, and easily performed by operators. With its clean design, the R.A Jones Maxim<sup>®</sup> Tissue cartoner is the solution to tissue packaging problems.
