

FILTER PRE-SEPARATOR

Bulk Recovery Drum

ADDED COLLECTION CAPACITY FOR DRY MEDIA

Any of Ruwac's industrial vacuums can be equipped with a specialty bulk recovery drum separator. These filtered separation systems come standard in 30 or 55 gallon sizes and are ideal for separating dry media such as blown-in insulation, lint, felt, cotton, Styrofoam, paper dust and other large particles in large quantities. Simply attach the separator to any Ruwac vacuum for added capacity, as all parts are available for use with an existing Ruwac portable vacuum or central vacuum system. An optional drum caddy and tipping mechanism allows for maximum mobility of your bulk recovery drum!

Optional tipping mechanism for easy disposal

Available in 30 or 55 gallon capacities

Drum cart allows for maximum mobility
