

LABELING SOLUTIONS FROM ID TECHNOLOGY

## Reduce Downtime in Your Harsh Environments With Labeling Solutions From ID Technology.

## Tough and ready

Many production environments weren't designed with labeling in mind. Cold, moisture, dust and chemicals are just a few elements that result in downtime for labeling systems. The Specialists at ID Technology have outfitted some of the most popular systems to be able to withstand the punishment of these harsh environments.

Fully enclosed stainless steel cabinets, removable doors and pneumatic wash down enclosures are combined with industrial construction resulting in customizable, compact systems that operate with the reliability you've come to expect from IDT. Your ID Technology Specialist can help with a system that's just right for you.

## The IDT Advantage

*Being an industry leader in labeling, coding and marking means ID Technology offers lower cost of ownership and the highest levels of performance and flexibility in every solution we provide.*

## Model 250E Label Printer Applicator with Enclosure

### Complete reliability

With the industry-leading Model 250 Label Printer Applicator at its heart, this exclusive design eliminates the need to use a separate enclosure for protection. All machine components and modules are mounted on a specially designed faceplate and enclosed in a stainless steel cabinet.

The U-Arm is mounted on the outside of the enclosure allowing mounting flexibility and the enclosure is equipped with a removable door for label application operations. Front and back panels are hinged for easy access to the print engine, operator controls and media loading.

- Enclosure is 12 gauge stainless steel with a Nema 4 rating
- 12.5" unwind
- Up to 7"x12" label
- 12" Tamp or 12" swing-tamp
- Cork/rubber seals at U-arm junction
- Optional stainless steel U-arm and mounting post

## Model 450W High Speed Wipe-On Label Printer Applicator

### Fast and easy

If you're looking for higher output, the Model 450W is a high speed wipe-on label printer applicator that applies labels 30-40% faster than standard tamp style applicators. Strategically placed fans, rollers and an optional secondary wipe are integrated into the unit to ensure clean, precise label placement.

The stainless steel cabinet base is designed to allow easy access for servicing. All major modules can be swapped out in minutes while all settings are made using the intuitive color touch screen operator interface. And label changeover from 3"x4" up to 6"x13" can be done without tools, further reducing down time.

- High-speed wipe-on
- No tool label size change
- Side apply with corner wrap wipe option
- Airless option
- Easy operator access
- Color touch screen interface
- Available full wash down option

## Auto-Redundant Label Print Apply System

### Doubly dependable

This innovative system utilizes two Model 250 Label Printer Applicators to ensure zero-downtime for your production line. When one labeling head is off-line for label and ribbon replacement, the second head is triggered for immediate operation.

Each unit is mounted on a swivel mechanism in a rugged compartmentalized stainless steel protective cabinet allowing each unit to swing out of the cabinet for easy service and maintenance. To protect the tamp assembly the cabinet is fitted with removable covers that can be conveniently stored inside the cabinet.

- Zero downtime
- Wash down cabinet
- Easily serviceable
- Rugged, industrial construction
- Model 250 Label Printer Applicators

## Model 250 Printer Applicator with Pneumatic Wash Down Cabinet

### We've got you covered

Built on a specially designed high-speed Model chassis, this rugged printer applicator utilizes a wipe-on applicator assembly to apply labels faster and more accurately than a pneumatic tamp. Labels from 2" wide up to 6" wide and from 3" long to 13.25" long can be used without ANY setting changes or changing tools with a reverse vacuum fan ensuring accurate placement of larger labels.

A pneumatically controlled, protective hood is easily raised and lowered by the flip of a lever for protection during wash down or unparalleled access to the printer applicator. Two large service doors are also located at the base of the enclosure for added convenience.

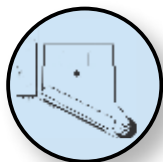

*IDT hazardous environment systems are compatible with a range of print engines and application modules to create systems unique to your applications.*

- Applies labels from 3" to 13.25" long without tool changes
- Pneumatically controlled hood
- Incredible access to all components
- Fast and accurate wipe-on assembly
- Optional secondary wipe in the same enclosure for 2 panel label application

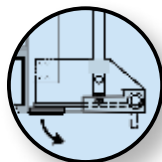

*Tamp & Tamp-Blow*

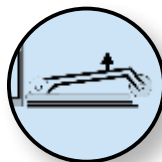

*Wipe On*

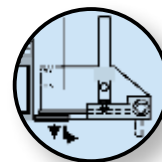

*Swing-Arm*

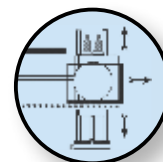

*Corner Wrap*

*Dual Panel*

*Three-Panel*

### The labeling, coding and marking specialists

The most valuable aspect of the IDT Advantage is the support. Our specialists stand ready to help you design a turn-key identification system that meets the needs of your harsh production environment. No matter how big or small your labeling requirements may be, IDT has a print-apply solution to meet every need. And only IDT has local PMMI-certified technicians that make up our nationwide sales and service network, ensuring that you can count on ID Technology to keep you up and running.
