

Penicillin Production

Case Study

Project Location

Spain

Sector

Pharmaceutical

Equipment Description **OptiFlo 3RC12 BIBO**

Our clients goal was to provide ventilation from a room for penicillin manufacturing.

AAF supplied an OptiFlo 3RC12 complete with antistatic cartridges, earthing, an explosion vent panel, exhaust fan and control panel designed to ensure compliance with international regulations. The unit was fully pre-wired and incorporated a bag in/bag out safe change facility.

Outcome: The system successfully provided the necessary local exhaust ventilation whilst providing a non hazardous environment for replacement of the filter canisters and collected dust.
