

Overview Preparing

Adhesives & Chemicals		
ViscoTreat-H	ViscoTreat-P	ViscoTreat-R
		
Hydraulic accumulator	Hydraulic accumulator	Preparation system
Available in sizes 150 ml and 300 ml	Buffer volume 25 ml	Dosing volume from ~4,0 ml/rev. to ~13,5 ml/rev.
Balancing of pressure fluctuations in the material supply	Balancing of pressure fluctuations in the material supply	Medium to high viscous medium, e.g.: silicones, adhesives, resins, grease, colour pastes, metal filled pastes (Cu and Ni solder pastes, Al and Ag pastes)
Buffer function	Buffer function	Viscosities up to 50,000 mPas
Reduction of input pressure at dispenser	Reduction of hose diameters	
	Avoidance of cavitations	

ViscoTreat-Im	ViscoTreat-I	ViscoTreat-Produkt Versorgungstank
		
Preparation systems	Preparation systems	Preparation systems
Inline material supply with simultaneous degassing	Inline material supply with simultaneous degassing	Inline material supply with simultaneous degassing
Tank capacity 2.5 l	Tank capacity 25 l	Tank capacity 2.5 l
Viscosities up to 100,000 mPas	Viscosities up to 1,000,000 mPas	Viscosities up to 100,000 mPas
