## Powder Packer Module

**Change recipe faster  
than ever before!**

www.matconibc.com

# Powder Packer Module...

...minimises the risk of segregation and helps reduce changeover time at recipe changes.

### Key Features

- 1 Intermediate Bulk Container (IBC)
- 2 Discharge Station
- 3 Sifter or Comil (optional)
- 4 Metal Detector (optional)
- 5 Bag or Box Filling Head
- 6 Weigh Scale
- 7 Touchscreen PLC Controls

## The Goals of Lean Powder Processing

- Reduce the cost per kilogram manufactured
- Reduce inventory – improve cash utilisation
- Maximise plant flexibility - make to order
- Enable rapid product change-over
- Optimise flow manufacturing

### Key Benefits

- ▶ Decoupled operation for maximum flexibility
- ▶ Direct dosing from IBC – less to clean and lower investment cost
- ▶ Compact system – quick recipe changes
- ▶ Quality Assurance – optional sifting & metal detection
- ▶ Clean operation with the use of integrated dust collection - ensure Health & Safety compliance
- ▶ Modular solution – factory assembled - proven design - low risk
